Independent Auditor's Report

To the Board of Directors
Montana State Fund
Helena, Montana

Report on the Financial Statements

We have audited the accompanying statutory financial statements of Montana State Fund (MSF), a component unit of the State of Montana, which comprise the statutory statements of admitted assets, liabilities, and policyholders' equity as of December 31, 2015, and the related statutory statements of operations, changes in policyholders' equity, and cash flows for the six months ended December 31, 2015, and the related notes to the statutory financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with the accounting practices prescribed or permitted by the Insurance Department of the Montana State Auditor's Office. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles

As described in Note 1 to the financial statements, the financial statements are prepared using accounting practices prescribed or permitted by the Insurance Department of the Montana State Auditor's Office, which is a basis of accounting other than accounting principles generally accepted in the United States of America. The effects on the financial statements of the variances between the statutory basis of accounting described in Note 1 and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material.

Adverse Opinion on U.S. Generally Accepted Accounting Principles

In our opinion, because of the significance of the matter described in the Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles paragraph, the financial statements referred to above do not present fairly, in accordance with accounting principles generally accepted in the United States of America, the financial position of Montana State Fund as of December 31, 2015, or the results of its operations or its cash flows for the six months ended December 31, 2015.

Opinion on Regulatory Basis of Accounting

In our opinion, the financial statements referred to above present fairly, in all material respects, the admitted assets, liabilities, and policyholders' equity of Montana State Fund as of December 31, 2015, and the results of its operations, changes in policyholders' equity and its cash flows for the six months ended December 31, 2015, on the basis of accounting described in Note 1.

Exchange offer for bond - acquisition	(8,985,758)

Note 1 - Nature of Operations and Significant Accounting Policies

Nature of Operations

The Montana State Fund (MSF) is a nonprofit, independent public corporation established under Title 39, Chapter 71 of the Montana Code Annotated (MCA). MSF provides Montana employers with an option for workers' compensation and occupational disease insurance and guarantees available coverage for all employers in Montana. MSF is governed by a seven member Board of Directors appointed by the Governor. The Board has full power, authority, and jurisdiction in the administration of MSF as fully and completely as the governing body of a private mutual insurance carrier. MSF is allocated to the State of Montana, Department of Administration for administrative purposes only, and is reported as a component unit in the State's Comprehensive Annual Financial Reports. MSF is exempt from federal or state income and premium taxes.

MSF functions as an autonomous insurance entity supported solely from its own revenues. All assets, debts, and obligations of MSF are separate and distinct from assets, debts, and obligations of the State of Montana. State law requires MSF to set premiums at least annually at a level sufficient to ensure adequate funding of the insurance program during the period the rates will be in effect. If MSF is dissolved by an act of law, the money in MSF is subject to the disposition provided by the legislature enacting the dissolution with due regard given to obligations incurred and existing (Section 39-71-2322, MCA). MSF governs, operates and completes its financial reporting as an insurance company domiciled in the State of Montana. However, as of December 31, 2015 MSF was not required to file its annual statement and audited financial reports with the Insurance Department (MDOI) of the Montana State Auditor's Office (SAO).

The 2015 legislature passed SB 123, which significantly changed the regulatory oversight of MSF beginning January 1, 2016. MSF was issued a Certificate of Authority, became an authorized insurer regulated by the MDOI and will be subject to the provisions of Title 33, Montana Insurance Code. MSF financial reporting will convert from a fiscal year ending June 30 to a calendar year of January 1 to December 31. The first calendar year period will begin on January 1, 2016 and quarterly and annual regulatory filings will be submitted to the insurance department as required under the law change. The accompanying financial statements are as of, and for the six month conversion period ended, December 31, 2015, and therefore do not include a comparable prior period.

During the 1990 Montana Special Legislative Session, legislation passed establishing separate liabilities, funding and accounts for claims of injuries resulting from accidents occurring before July 1, 1990, referred to as the Old Fund, and claims occurring on or after July 1, 1990, referred to as MSF. This report reflects only the operations of Montana State Fund. MSF administers and manages the remaining claims of the Old Fund. The State of Montana pays MSF an administrative fee and provides the funding for the Old Fund benefit payments.

Basis of Presentation

The accompanying financial statements of MSF have been prepared in conformity with accounting practices prescribed and permitted by the MDOI (Statutory Accounting Principles or SAP). Such practices vary from accounting principles generally accepted in the United States of America (GAAP) principally in that certain assets reportable under GAAP are "non-admitted" under SAP and have been excluded from the accompanying statutory statements of admitted assets, liabilities and policyholders' equity and charged directly against equity. In addition, certain investments that would be carried at estimated fair value under GAAP are carried at amortized cost or the lower of amortized cost or fair market value for SAP. Certain amounts in the notes to the financial statements have been rounded to the nearest thousand or million and such amounts are annotated with a "K" or "M," respectively.

The MDOI recognizes only statutory accounting practices prescribed or permitted by the State of Montana for determining and reporting the financial condition and results of operations of an insurance company. The National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures* manual (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the State of Montana.

Differences of NAIC SAP from Generally Accepted Accounting Principles

Statutory accounting practices vary in some respects from U.S. generally accepted accounting principles (GAAP). Such significant differences include the following:

- a. Investments in equity securities are carried at current market values as determined by the NAIC;
- b. Investments in bonds are generally carried at amortized cost, while under GAAP, they are carried at either amortized cost or estimated fair value based on their classification according to the Company's ability and intent to hold or trade the securities;
- c. Assets having economic value other than those that can be used to fulfill policyholder obligations are categorized as "nonadmitted assets" and are not permitted to be included in the statutory financial statements of admitted assets, liabilities and capital and policyholders' equity, whereas for GAAP, these assets are recognized in the balance sheet, subject to any valuation allowances. Assets reported under NAIC SAP as "non-admitted" are excluded through a charge against unassigned policyholders' equity. Included with non-admitted assets are furniture, certain equipment and software, prepaid expenses and certain receivables that do not meet statutory criteria for admitted assets.
- d. Receivables over 90 days outstanding are not admitted to the statutory financial statements and charged against statutory policyholders' equity, whereas, for GAAP, the Company assesses the collectability of premiums receivable and any charge for uncertain collection is made to the income statement.
- e. Cash, cash equivalents, and short-term investments in the statements of cash flows represent cash balances and investments with initial maturities of one year or less. Under GAAP, the corresponding caption of cash and cash equivalents include cash balances and investments with initial maturities of three months or less.
- f. Commissions allowed by reinsurers on business ceded are reported as income when received rather than being deferred and, to the extent recoverable, amortized over the life of the policy, as required under GAAP.
- g. Governmental pension accounting standards (GASB 68) require recognition of an allocation of the state's unfunded retirement plan liability at the agency level. Under SAP, the recording of a portion of the unfunded liability is not required for a reporting entity who participates in a plan sponsored by another entity but is not directly liable for the obligations under the plan (SSAP No. 102 paragraph 81); however, the amounts contributed to the plan by MSF are recorded as expense in the current period.
- h. The statutory statement of cash flows differs in certain respects from the presentation required within GAAP literature, including presentation of changes of cash and short investments instead of cash and cash equivalents. In addition, GAAP requires a reconciliation of net income to net cash from operating activities. Short term investments include securities with a maturity of one year or less and are included in the cash balance, whereas GAAP excludes short term investments from cash. Both statutory and GAAP include cash equivalents in the cash balance. Cash equivalents are defined as highly liquid investments with a maturity of three months or less at acquisition.

- i. The statutory financial statements are prepared in conformity with the Annual Financial Reporting Model Regulation # 205, which requires the audited financial statements to conform to the language and groupings used to prepare the Annual Statements filing as set out by the NAIC.

The differences between statutory accounting practices and GAAP are material. See Note 17 for a listing of significant differences.

MSF's financial statements are stated on a NAIC SAP basis except where certain differences are set out in the Montana Code Annotated (MCA). MCA references conformity with the Accounting Practices and Procedures Manual within section 33-2-701(1) and therefore concludes that no legislation is necessary to adopt its use.

For the six months ended December 31, 2015, there was no difference of MSF's net income and policyholder's equity between NAIC SAP and practices prescribed and permitted by the State of Montana.

Significant Statutory Accounting Policies

Cash and Cash Equivalents

Cash constitutes a medium of exchange that a bank or other similar financial institution will accept for deposit and allow an immediate credit to the depositor's account. Savings accounts, certificates of deposits with maturity dates of one year or less, and cash equivalents are also classified as cash. Cash equivalents are investments with original maturities of three months or less; are readily convertible to known amounts of cash; and present insignificant risk of change in value due to changes in interest rates. The Montana State Treasury and the Montana Board of Investments (BOI) hold MSF's cash and cash equivalent balances. At times during the year, MSF's cash balances are in excess of federally insured limits. The Company does not consider this a material risk.

Short-Term Investments

Short-term investments are those investments with remaining maturities of one year or less at the time of acquisition, excluding those investments classified as cash equivalents. Short-term investments include but are not limited to bonds, commercial paper, money market instruments, repurchase agreements, and collateral and mortgage loans that meet the above criteria. MSF participates in the Short-Term Investment Pool (STIP), maintained by the BOI. STIP balances are highly-liquid investments. The net asset value (NAV) of STIP materially approximates cost.

Investments

Equity securities, bonds, investments in partnerships and limited liability companies, and certificates of deposit with original maturities greater than one year are long-term investment securities. Long-term securities are held by BOI. State Street Bank is the custodial bank for BOI.

Equity securities are valued at fair market value. The Montana Constitution allows investing in equity securities, with the restriction that equity securities cannot exceed 25% of total investment book value. The BOI approved a policy statement to maintain the allocation to public equities at 10% of total portfolio market value. The allocation range is set at +/-2%, or 8% to 12%. Investments in equity securities are carried at current fair market value as determined by the Securities Valuation Office (SVO), and the related unrealized capital gains (losses) are reported in policyholders' equity.

Bonds are rated and valued in accordance with the NAIC Securities Valuation Office (SVO) rating guidelines. Bonds with a SVO rating of 1 and 2 are valued at amortized cost. Bonds with a SVO rating of 3 or higher are valued at the lower of amortized cost or market.

Investments in partnerships and limited liability companies are valued based on the underlying audited U.S. GAAP equity of the investee in accordance with SSAP No. 48 and/or SSAP No. 97. The related unrealized capital gains (losses) are reported in policyholders' equity.

MSF has no derivative investments.

Investments in Real Estate are comprised of property occupied by the Company. These investments are recorded at depreciable cost net of related debt obligation, which was zero as of December 31, 2015. Depreciation is calculated on a straight-line basis over the estimated useful life of the property. Land is valued at historical cost.

Investment income consists of interest and dividends, net of related investment expenses. Interest is recognized on an accrual basis and dividends are recorded as earned at the ex-dividend date. Realized capital gains and losses are determined using the first-in first-out method at the time of disposition.

MSF's fund manager uses the scientific (constant yield) interest method of amortization in accordance with SSAP No. 26. Securities transactions are recorded on the trade date.

Fair Values of Financial Instruments

Statement of Statutory Accounting Principles (SSAP) No. 100, "Fair Value Measurements" defines fair value as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities required to be recorded at fair value, the Company considers the principal or most advantageous market in which it would transact and considers assumptions that market participants would use when pricing the asset or liability, such as inherent risk, transfer restrictions, and risk of nonperformance.

The Company classified its investments based upon an established fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. SSAP No. 100 describes a fair value hierarchy based on three levels of inputs, of which the first two are considered observable and the last unobservable, that may be used to measure fair value, which are the following:

- Level 1—Quoted prices in active markets for *identical* assets or liabilities.
- Level 2—Inputs other than Level 1 that are observable, either directly or indirectly; such as quoted prices for *similar* assets or liabilities, quoted prices in markets that are not active; or other inputs that can be corroborated by observable market data for substantially the full term of the assets or liabilities.
- Level 3—Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value or for those assets not stated at fair value in the financial statements but whose estimated fair values are disclosed.

Bonds – Issuer Obligations, including Industrial and Miscellaneous: Valued based on NAIC market values. For those securities not actively traded, quoted market prices of comparable instruments or discounted cash flow analysis are used based upon inputs that are observable in the markets for similar securities. Inputs include benchmark yields, credit spreads, default rates, prepayments and non-bonding broker quotes.

Bonds – Mortgage and Other Asset-Backed Bonds: Valued based on Commercial and Residential Mortgage Backed Securities modeling file provided by the NAIC. The prepayment assumptions used for single class and multi-class mortgage-backed/asset-backed securities were obtained from broker/dealer survey values. These assumptions are consistent with the current interest rate and economic environment.

Equity Securities-Unaffiliated and Mutual Funds: Valued based on NAIC quoted market values. If NAIC market values are unavailable, value is determined based on the underlying equity.

Other Invested Assets: Value is based on the underlying equity of the related entity.

Cash and Cash Equivalents: The carrying amounts approximate fair value.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of the future fair values. Furthermore, although the company believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Other-Than-Temporary Declines in Fair Value

The Company regularly reviews its investment portfolio for factors that may indicate that a decline in fair value of an investment is other-than-temporary. Some factors considered in evaluating whether or not a decline in fair value is other-than-temporary include: the Company's ability and intent to retain the investment for a period of time sufficient to allow for a recovery in value; the duration and extent to which fair value has been less than cost; and the financial condition and prospects of the issuer. When an other-than-temporary impairment is recognized, the security is written down to an estimated fair value and the amount of the write-down is recorded as a realized loss.

Cash Collateral and Liability for Securities on Loan

Under the provisions of state statutes, the Montana Board of Investments (BOI) has, by a Securities Lending Authorization Agreement, authorized the custodial bank, State Street Bank, to lend BOI's securities to broker-dealers and other entities with a simultaneous agreement to return the collateral for the same securities in the future. During the period the securities are on loan, BOI receives a fee and the bank must initially receive collateral equal to 102% of the market value of the securities on loan and must maintain collateral of at least 100% of the market value of the loaned security. BOI retains all rights of ownership during the loan period.

The cash collateral received on each loan was invested, together with the cash collateral of other qualified plan lenders, in a collective investment pool, the Securities Lending Quality Trust. The relationship between the average maturities of the investment pool and BOI's loans was affected by the maturities of the loans made by other plan entities that invested cash collateral in the collective investment pool, which BOI could not determine. On December 31, 2015, BOI had no credit risk exposure to borrowers.

Premium Receivable

Premium receivable balances with an amount due over 90 days are non-admitted assets. MSF evaluates the remaining admitted accounts receivable asset for impairment. If it is probable that any amounts are not collectible, the uncollectible receivable is written off and charged to income in the period the determination is made.

Computer Equipment and Software

Computer equipment is capitalized if the actual or estimated historical cost exceeds \$5,000. Software is capitalized if the actual or estimated historical cost exceeds \$100,000. Computer equipment is depreciated on a straight-line basis over an estimated useful life of three years. Software is amortized on a straight-line basis using a three-year life for operating software and a five year life, or less, for application software. In accordance with statutory accounting principles, computer equipment and operating software are admitted assets, although Montana §33-2-501(11) limits admission of EDP equipment to a maximum of 1% of admitted assets. Application software is a non-admitted asset.

Furniture, Equipment and Leasehold Improvements

Furniture and equipment are capitalized if the unit cost exceeds \$5,000, and are recorded at cost and depreciated on a straight-line basis using estimated useful lives, which range from five to ten years. There are no leasehold improvements. Statutory accounting principles require that furniture, equipment and leasehold improvements be capitalized, depreciated and non-admitted.

Other Assets

Other assets include advances for the Other States Coverage reinsurance contracts.

Risks and Uncertainties

Risks and uncertainties existing as of the date of the financial statements are as follows:

Credit Risk – Credit risk is defined as the risk that an issuer or other counterparty to an investment will not fulfill its obligation. With the exception of the U.S. Government securities, fixed income instruments have credit risk as measured by major credit rating services. This risk is that the issuer of a fixed income security may default in making timely principal and interest payments. The Board of Investment's policy requires MSF fixed income investments, at the time of purchase, to be rated an investment grade as defined by Moody's and/or Standard & Poor's (S&P) rating services. The U.S. Government securities are guaranteed directly or indirectly by the U.S. Government. Obligations of the U.S. Government or obligations explicitly guaranteed by the U.S. Government are not considered to have credit risk.

Custodial Credit Risk – Custodial credit risk for investments is the risk that, in the event of the failure of the counterparty to a transaction, a company will not be able to recover the value of the investment or collateral securities that are in the possession of an outside party. As of December 31, 2015, all the fixed income and other equity securities were registered in the nominee name of BOI and held in the possession of BOI's custodial bank, State Street Bank.

Concentration of Credit Risk – Concentration of credit risk is the risk of loss attributed to the magnitude of a company's investment in a single issuer. The MSF Investment Policy requires credit risk to be limited to 2% of the total securities portfolio in any one name. The MSF Investment Policy provides for "no limitation on U.S. government/agency securities." Investments issued or explicitly guaranteed by the U.S. Government are excluded from the concentration of credit risk requirement.

Interest Rate Risk – Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The MSF Investment Policy sets an average portfolio duration range of 2-5 years for fixed income securities except in extraordinary circumstances where a shorter duration may be advisable. BOI uses the effective duration method to calculate interest rate risk. The Board's analytics software uses an option-adjusted measure of a bond's (or portfolio's) sensitivity to changes in interest rates.

Corporate asset-backed securities are based on cash flows from principal and interest payments on underlying automobile loan receivables, credit card receivables, and other assets. These securities, while sensitive to prepayments due to interest rate changes, have less credit risk than securities not backed by pledged assets.

MSF investments are categorized in Note 2 to disclose credit and interest rate risk as of December 31, 2015.

Uncertainty Due to Litigation – In the ordinary course of business, MSF is a defendant in various litigation matters. Although there can be no assurances, as of December 31, 2015, in the opinion of MSF's management based on information currently available, the ultimate resolution of these legal proceedings would not be likely to have a material adverse effect on its statutory results of revenue and expenses, admitted assets, liabilities and policyholders' equity or liquidity. For further discussion, refer to Note 14 (Contingencies and Uncertainties).

Vulnerability Due to Certain Concentrations – MSF conducts its business primarily within the State of Montana and is susceptible to risk based on the economy of the geographic territory it serves. As of December 31, 2015, about 72% of total premium was written through appointed agency producers, and about 28% was written directly by MSF. One agency, which is one of the largest insurance brokerages in the United States, represented 38% of MSF's total premium as of December 31, 2015.

Use of Estimates – The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates. Material estimates susceptible to significant change include loss and loss adjustment expense reserves, the fair value of investments, investment impairments, and cost allocation processes.

Reinsurance Risk – Reinsurance contracts do not relieve the Company from its obligations to insureds. Failure of reinsurers to honor their obligations could result in losses to the Company. The Company evaluates the financial condition of its reinsurers to minimize its exposure to significant losses from reinsurer insolvencies. Management believes that any liability arising from this contingency would not be material to the Company's financial position.

Risk-Based Capital – Risk-based capital (RBC) is a method developed by the NAIC to measure the minimum amount of capital appropriate for an insurance company to support its overall business operations in consideration of its size and risk profile. The formulas for determining the amount of RBC specify various weighting factors that are applied to financial balances or various levels of activity based on the perceived degree of risk of such activities. The adequacy of the company’s actual capital is measured by the RBC results as determined by the formulas. Companies below minimum RBC requirements are subject to specified corrective action. MSF was not required to report its RBC as of December 31, 2015 but will begin reporting and being regulated based on its RBC for the year ending December 31, 2016.

Administrative Cost Allocation

State law (Section 39-71-2352, MCA) requires MSF to separately determine and account for administrative expenses and benefit payments on claims for injuries resulting from accidents occurring before July 1, 1990 (Old Fund) from those occurring on or after July 1, 1990 (MSF). The law also limits annual administrative costs of claims associated with the Old Fund to \$1.25M. MSF received \$430K from the State of Montana for the administration of the Old Fund for the six months ended December 31, 2015.

Losses Incurred and Loss Adjustment Expense Estimates

Loss and loss adjustment expense (LAE) reserves are established to provide for the estimated ultimate settlement cost of all claims incurred. Loss reserves are based on reported aggregate claim cost estimates combined with estimates for future development of such claim costs and estimates of incurred but not reported (IBNR) claims. Because actual claim costs depend on such complex factors as inflation and changes in the law, claim liabilities are recomputed periodically using a variety of actuarial and statistical techniques to produce current estimates that reflect recent settlements, claim frequency, and other economic and social factors. There can be no assurance that the ultimate settlement of losses may not vary materially from the estimate recorded. Since liabilities are based on estimates, the ultimate liability may be in excess of, or less than, the amounts provided. Adjustments to these estimates of reserves will be reflected in the Statutory Statement of Operations in future years.

A provision for inflation and the calculation of estimated future claim costs is implicit in the calculation because reliance is placed both on actual historical data that reflect past inflation and on other factors that are considered to be appropriate modifiers of past experience.

Losses and loss adjustment expenses are presented at face value net of estimated reinsurance recoverable. For further discussion, refer to Note 8.

Reinsurance Recoverable on Paid and Unpaid Losses

Reinsurance recoverables are estimates of paid and unpaid losses collectible from MSF’s reinsurers. The amounts ultimately collected may be more or less than these estimates. Any adjustments of these estimates are reflected in revenues and expenses as they are determined.

Unearned Premiums

Unearned premium reflects premium that has been written but not yet earned. Premiums are earned and thereby recognized as revenue on a pro-rata basis over the policy period, beginning on the effective date of the policy. The unearned premium was \$68M at December 31, 2015.

Premium Deficiency Reserve

Premium deficiency reserves and the related expense are recognized when it is probable that losses, loss adjustment expense and policy maintenance costs under a group of existing contracts will exceed net earned premium, reinsurance recoveries and anticipated investment income. No such reserves were required at December 31, 2015.

Other Liabilities

- Security Deposits - Security deposits are monies held on behalf of certain policyholders based on arranged payment terms or account history.
- Funds Withheld - Funds withheld are premiums due to reinsurers on a contingent basis in accordance with the reinsurance contracts in place.
- Accounts Payable - Accounts payable includes liabilities incurred on behalf of claimants, refunds and dividends due to policyholders and amounts due to vendors.
- Compensated Absences - MSF supports two leave programs, the State of Montana Leave Program, (Traditional Plan) and the MSF Personal Leave Program. Employees covered in the Traditional Plan accumulate both annual leave and sick leave and MSF pays employees 100% of unused annual leave and 25% of unused sick leave upon termination. MSF also pays 100% of unused compensatory leave credits upon termination to employees in the Traditional Plan. Employees in the Personal Leave Program accumulate personal leave and extended leave. MSF pays employees for 100% of unused personal leave and banked holiday leave upon termination but extended leave has no cash value at the time of termination.
- Other Postemployment Benefits - Postemployment benefit obligations are administered by the State of Montana. The liability and expense are recorded, and are amortized on a GAAP basis as provided by the State because a statutory valuation is not available. Management believes the difference between the GAAP valuation and the SAP valuation is not material to these financial statements. For further discussion, refer to Note 9.

Income and Premium Taxes Payable

MSF is a component unit of the State of Montana and is not subject to Federal or State premium or income tax.

Prepaid Expenses

The Company adopted an accounting policy for prepaid expenses which is to recognize costs that benefit several accounting periods as prepaid assets to the extent that an individual cost exceeds \$10,000. The Company has elected to immediately expense those prepaid costs that do not exceed \$10,000. Prepaid expenses are amortized and expensed over the period of use. Prepaid expenses that are unamortized at the end of a financial reporting period are nonadmitted and charged to policyholder equity in accordance with statutory accounting principles.

Premium Revenue

Premiums are recognized as revenue on a pro-rata basis over the policy period, beginning on the effective date of the policy. MSF's Board of Directors approves premium rates annually.

Policyholders, with the exception of State of Montana agencies, are contractually obligated to pay certain premiums to MSF in advance of the period in which the premiums are earned. Advance premiums are deferred until the effective date of the policy at which time they are recognized as revenue on a pro-rata basis over the term of the policy. Premium advances are refundable when the policyholder's coverage is canceled and MSF has credited all earned premiums. State agency premium is estimated and payments are received quarterly in arrears based on the actual reported payroll.

Retrospectively Rated Policies

MSF issues policies for which the premiums vary based on loss experience. Future premium adjustments for these retrospective policies are estimated and accrued at December 31, 2015. The premium adjustments are determined through the review of each individual retrospective rated policy, comparing actual losses with projected future losses, to arrive at the best estimates of return or additional retrospective premiums. MSF records retrospective premium accruals and receivables as adjustments to earned premium. Return premiums are recorded as liabilities and additional premiums are recorded as assets.

Policy Acquisition Costs

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred.

Advertising Costs

All advertising costs are expensed when incurred. Advertising expense was \$341K for the six months ended December 31, 2015.

Policyholder Dividends

Dividends are discretionary and are accrued and expensed when declared and approved by the MSF Board of Directors. The aggregate amount of policyholders' dividends is based on the analysis of policyholder equity balances and the financial results for the policy year. For further discussion, refer to Note 10.

Note 2 - Investments

The investments of MSF at December 31, 2015 are as follows:

	Total Investment Holdings	Percentage
Bonds:		
U.S. Government obligations	\$ 198,466,619	13.26%
All other government obligations	25,997,345	1.74%
U.S. Special revenue	242,790,879	16.22%
Industrial and miscellaneous	639,551,301	42.72%
Mortgage and other loan-backed securities	4,064,259	0.27%
Total bonds	1,110,870,403	74.20%
Equity securities	163,817,100	10.94%
Cash and short-term investments	78,779,178	5.26%
Other invested assets	89,239,954	5.96%
Securities lending collateral	28,299,273	1.89%
Real Estate - Property occupied by the Company	26,109,223	1.74%
Total invested assets	\$ 1,497,115,131	100.00%

MSF has investments in two companies – TIAA CREF Asset Management Core Property Fund LP and American Core Realty Fund LLC – which have underlying characteristics of real estate and are classified as other invested assets. The total acquisition cost for each investment was \$35M and \$40M, respectively.

The cost or amortized cost, gross unrealized gains, gross unrealized losses, and estimated fair value of invested assets are as follows at December 31, 2015:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Statutory Fair Value
U.S. Government obligations	\$ 198,466,619	\$ 7,102,786	\$ (415,575)	\$ 205,153,830
All other government obligations	25,997,345	169,396	(139,274)	26,027,467
U.S. Special revenue	242,790,879	6,485,163	(162,599)	249,113,443
Industrial and miscellaneous	639,551,301	16,450,368	(1,999,847)	654,001,822
Mortgage and other loan- backed securities	4,064,259	274,778	-	4,339,037
Total bonds valued at amortized cost	\$ 1,110,870,403	\$ 30,482,491	\$ (2,717,295)	\$ 1,138,635,599
	Actual Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Statutory Fair Value
Equity securities	\$ 75,265,243	\$ 88,551,857	\$ -	\$ 163,817,100
Other invested assets	75,000,000	14,239,954	-	89,239,954
Total securities valued at fair value	\$ 150,265,243	\$ 102,791,811	\$ -	\$ 253,057,054

The gross unrealized losses and fair value of the Company's investments, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, were as follows at December 31, 2015:

	Less than 12 months		12 months or longer		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
U.S. Government obligations	\$ 19,546,870	\$ (152,871)	\$ 19,480,460	\$ (262,704)	\$ 39,027,330	\$ (415,575)
All other government obligations	15,920,567	(84,848)	4,943,340	(54,426)	20,863,907	(139,274)
U.S. Special revenue	15,069,950	(96,529)	8,620,172	(66,070)	23,690,122	(162,599)
Industrial and miscellaneous	168,558,827	(1,575,779)	54,183,664	(424,068)	222,742,491	(1,999,847)
	<u>\$ 219,096,214</u>	<u>\$ (1,910,027)</u>	<u>\$ 87,227,636</u>	<u>\$ (807,268)</u>	<u>\$ 306,323,850</u>	<u>\$ (2,717,295)</u>

MSF closely monitors its investment portfolio and considers relevant facts and circumstances in evaluating whether the impairment of a security is other than temporary. Relevant facts and circumstances that are considered include: (1) the length of time the fair value has been below cost; (2) the financial position and access to capital of the issuer, including the current and future impact of any specific events; and (3) MSF's ability and intent to hold the security to maturity or until it recovers in value. To the extent the Company determines that a security is deemed other-than-temporarily impaired, the difference between amortized cost and fair value is charged to earnings. Based on the Company's evaluation and ability and intent to hold these securities to maturity or market value recovery, the impairment of the securities identified above is deemed to be temporary.

The amortized cost and estimated statutory fair value of MSF's fixed maturity securities as of December 31, 2015 is shown below at contractual maturity. Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. Maturities of mortgage-backed securities depend on the repayment characteristics and experience of the underlying mortgage loans.

	Amortized Cost	Estimated Statutory Fair Value
Due one year or less (excludes STIP)	\$ 111,645,284	\$ 113,467,149
Due after one year through five years	629,994,235	647,669,001
Due after five years through ten years	359,284,898	367,068,208
Due after ten years through twenty years	9,945,986	10,059,990
Due after twenty years	-	371,251
	<u>\$ 1,110,870,403</u>	<u>\$ 1,138,635,599</u>

Proceeds from sales of invested assets and gross realized gains and gross realized losses on the sales of invested assets were as follows for the six months ended December 31, 2015:

Proceeds from sales of debt securities	\$ 67,368,575
Total proceeds from sales of invested assets	<u>\$ 67,368,575</u>
Gross realized gains of debt securities	\$ 1,228,364
Gross realized losses of debt securities	(244,655)
Net realized capital gains of invested assets	<u>\$ 983,709</u>

Investment income and related expenses were as follows for the six months ended December 31, 2015:

Investment income	
Interest	
Bonds	\$ 18,349,685
Cash and short-term investments	85,043
Real estate	821,505
Equities	3,824
Other invested assets	2,199,979
Securities lending income	182,002
Total investment income	<u>21,642,038</u>
Investment expenses	
Investment expenses	631,223
Depreciation on real estate	266,517
Total investment expenses	<u>897,740</u>
Net investment income	<u>\$ 20,744,298</u>

MSF's investment in property occupied by the Company is as follows at December 31, 2015:

Land	\$ 1,139,460
Properties occupied by the Company, net	<u>24,969,763</u>
Total real estate	<u>\$ 26,109,223</u>

Note 3 - Cash Collateral and Liability for Securities on Loan

The following table presents the carrying and market values of the securities on loan and the total collateral held as of December 31, 2015:

Securities on loan - carrying value	\$ 65,532,939
Securities on loan - market value	67,613,325
Total cash collateral held	28,299,273
Total non-cash collateral held	40,659,053

Note 4 - Fair Value of Financial Instruments

Certain financial instruments are reported at fair value and others are stated at cost or amortized cost, as shown below. For those assets carried at fair value in the financial statements and for those assets not stated at fair value in the financial statements but whose estimated fair values are disclosed, the following table indicated the inputs used to estimate fair value measurements.

The statement values, fair values and related inputs for financial instruments at December 31, 2015 are:

	2015				
	Statement Value	Fair Value	(Level 1)	(Level 2)	(Level 3)
Assets reported at amortized cost:					
Bonds	\$1,110,870,403	\$1,138,635,599	\$ 200,116,965	\$ 938,518,634	\$ -
Assets reported at fair value:					
Equity securities	\$ 163,817,100	\$ 163,817,100	\$ 146,505,781	\$ 17,311,319	\$ -
Other invested assets	89,239,954	89,239,954	-	-	(A)
Total assets reported at fair value	\$ 253,057,054	\$ 253,057,054	\$ 146,505,781	\$ 17,311,319	\$ -

(A) – These investments are accounted for using the equity method. For purposes of this disclosure, the equity method is presumed to approximate fair value. If management were to determine fair value for its equity method investments, it would use level 3 inputs.

There were no liabilities reported at fair value as of December 31, 2015.

Note 5 - Cash, Cash Equivalents and Short-Term Investments

MSF participates in the Short-Term Investment Pool (STIP) maintained by BOI. STIP balances are highly liquid investments. The net asset value (NAV) of STIP approximates cost. The STIP investments' credit risk is measured by investment grade ratings given individual securities. BOI's policy requires that STIP investments have the highest rating in the short-term category by one and/or any Nationally Recognized Statistical Rating Organizations (NRSRO). The three NRSRO's include Standard and Poor's, Moody's Investors Service, and Fitch, Inc. The balance in STIP was zero at December 31, 2015. Bonds are reported at amortized cost.

Cash, cash equivalents and short-term investments consist of the following at December 31, 2015:

Cash in bank	\$ 63,247,178
STIP investment	15,532,000
	<u>\$ 78,779,178</u>

Note 6 - Receivables, Net

Net receivables consist of the following at December 31, 2015:

Uncollected premiums	\$ 8,965,217
Nonadmitted uncollected premiums	(428,465)
Net uncollected premiums	<u>\$ 8,536,752</u>
Unbilled premiums and installments	\$ 64,386,322
Earned but unbilled premiums	3,732,626
Nonadmitted earned but unbilled premiums	(373,263)
Net unbilled premiums	<u>\$ 67,745,685</u>
Accrued retrospective premiums	\$ 154,807
Nonadmitted retrospective premiums	(15,480)
Net accrued retrospective premiums	<u>\$ 139,327</u>
Healthcare and other amounts receivable	\$ 2,071,776
Nonadmitted healthcare and other receivables	(1,863,483)
Net healthcare and other receivables	<u>\$ 208,293</u>

Note 7 - Equipment, Net

Equipment and software are recorded at cost net of accumulated depreciation and admitted or non-admitted in accordance with statutory accounting principles as follows at December 31, 2015:

	Computer Equipment and Operating Software	Vehicles, Furniture and Office Equipment	Application Software	Total
Assets	\$ 5,283,474	\$ 2,221,735	\$ 15,040,889	\$ 22,546,098
Accumulated depreciation	(4,035,113)	(1,095,422)	(14,681,976)	(19,812,511)
Subtotal	1,248,361	1,126,313	358,913	2,733,587
Less: Net assets non-admitted	-	(1,126,313)	(358,913)	(1,485,226)
Net assets admitted	\$ 1,248,361	\$ -	\$ -	\$ 1,248,361
Depreciation expense	\$ 158,570	\$ 113,809	\$ 161,199	\$ 433,578

Note 8 - Loss and Loss Adjustment Expense Reserves

Loss and loss adjustment expense (LAE) reserves are established to provide for the estimated ultimate settlement cost of all claims incurred. Loss reserves are based on reported aggregate claim cost estimates combined with estimates for future development of such claim costs and estimates of incurred but not reported (IBNR) claims. The reserves are reported on an undiscounted basis.

Willis Towers Watson, an external independent actuarial firm, prepares an actuarial study used to estimate liabilities and the ultimate cost of settling claims reported but not settled and IBNR as of December 31, 2015. The study provides a range of potential costs associated with the reported claims, the future development of those claims and IBNR. MSF management has recorded an estimate within that range as the estimated loss reserves. Because actual claim costs depend on such complex factors as inflation and changes in the law, claim liabilities are recomputed periodically using a variety of actuarial and statistical techniques to produce current estimates that reflect recent settlements, claim frequency, and other economic and social factors.

The following analysis provides a reconciliation of the activity in the reserve for losses and loss adjustment expenses for the six months ended December 31, 2015:

	(in 000's)
At beginning of the period:	
Gross liability for unpaid losses and loss adjustment expenses	\$ 931,149
Less reinsurance recoverables	(35,606)
Net liability for unpaid losses and loss adjustment expenses	895,543
Losses and loss expenses incurred during the period related to:	
Current period	74,379
Prior years	(524)
Total losses and loss adjustment expenses incurred	73,855
Losses and loss expenses paid during the period related to:	
Current period	(10,269)
Prior years	(58,833)
Total losses and loss adjustment expenses paid	(69,102)
At end of the period:	
Gross liability for unpaid losses and loss adjustment expenses	933,538
Less reinsurance recoverables	(33,242)
Net liability for unpaid losses and loss adjustment expenses	\$ 900,296

Changes in the reserve for loss and loss adjustment expenses related to prior years are due to ongoing analysis of loss development trends, re-estimation of unpaid claims, and reinsurance recovery adjustments.

Included in the amounts above are reserves for asbestos exposure. MSF's exposure to asbestos claims arose from the direct sale of workers' compensation policies to companies with incidental exposure to asbestos. Case reserves related to these claims are as follows as of December 31, 2015:

Beginning case reserves (including LAE)	\$ 5,258,573
Losses and LAE incurred	2,596,836
Payments for losses and LAE	(1,017,969)
Ending case reserves (including LAE)	\$ 6,837,440

Note 9 - Retirement Plans, Deferred Compensation and Postretirement Plans

MSF and its employees contribute to the Montana Public Employees Retirement System (PERS), which offers two types of retirement plans administered by the Public Employees' Retirement Board (PERB). The first plan is the Defined Benefit Retirement Plan (DBRP), a multiemployer pension plan for the benefit of State employees that provides retirement, disability and death benefits to plan members and their beneficiaries. MSF has no legal obligation for pension liabilities under this plan. However, MSF is required to record an allocated amount of the DBRP's unfunded liability on its GAAP financial statements. The amount of that liability is \$19.4M.

The second plan is the Defined Contribution Retirement Plan (DCRP), a multiemployer plan that also provides retirement, disability and death benefits to plan members and their beneficiaries. Benefits are based on the balance in the member's account, which includes the total contributions made and the investment earnings less administrative costs.

MSF contributed a total of \$833K to both plans during the six months ended December 31, 2015. The required employer contribution rate for both plans was 8.37% for the six months ended December 31, 2015. The liability for unpaid contributions at December 31, 2015 is \$89K, which was paid in January 2016.

MSF's allocated annual OPEB cost (expense) for the six months ended December 31, 2015 was \$544K. The liability is reported at the same amount determined on a GAAP basis for financial reporting required as a component unit of the State of Montana. While this liability is disclosed for financial statement purposes it does not represent a legal liability of MSF, and MSF does not complete a separate actuarial analysis for Statutory reporting purposes.

MSF and its employees are eligible to participate in the State of Montana Deferred Compensation Plan (457 plan) administered by the PERB. The Deferred Compensation plan is a voluntary, tax-deferred retirement plan designed as a supplement to other retirement plans. Under the plan, eligible employees elect to defer a portion of their salary until future time periods. MSF incurs no costs for this plan.

MSF employees and dependents are eligible to receive health care through the State Employee Group Benefits Plan administered by the State of Montana Department of Administration. The State of Montana provides optional post-employment medical, vision and dental health care benefits to qualified employees and dependents that elect to continue coverage and pay administratively established premiums.

Note 10 - Policyholder Dividends

During the six months ended December 31, 2015, the MSF Board of Directors authorized dividends of \$35M to eligible policyholders for the policy year 2013.

Note 11 - Reinsurance Assumed and Ceded

For the six months ended December 31, 2015, MSF ceded risk to other reinsurance companies to limit the exposure arising from large losses. These arrangements consist of excess of loss contracts that protect against occurrences over stipulated amounts and aggregate stop loss contracts. The excess of loss contracts provide for the following coverage:

<u>Contract Period</u>	<u>Reinsurance Coverage</u>
2015	Workers' compensation accidents of up to \$5M in excess of \$5M, maximum of \$5M per any one claimant.
	Workers' compensation accidents of up to \$20M in excess of \$10M, maximum of \$5M per any one claimant.
	Workers' compensation accidents of up to \$70M in excess of \$30M, maximum of \$5M per any one claimant.

The current aggregate stop loss contract provides coverage based on MSF's premium levels not to exceed 15% of subject net earned premium. In the event reinsurers are unable to meet their obligations under either the excess of loss contracts or aggregate stop loss contract, MSF would remain liable for all losses, as the reinsurance agreements do not discharge MSF from its primary liability to the policyholders.

Direct, assumed and ceded activity included the following for the six months ended December 31, 2015:

Written premiums:	(in 000's)
Direct	\$ 110,909
Assumed	705
Ceded	(5,545)
Net written premiums	<u>\$ 106,069</u>
Earned premiums:	
Direct	92,803
Assumed	1,237
Ceded	(5,545)
Net earned premiums	<u>\$ 88,495</u>
Unearned premiums:	
Direct	67,853
Assumed	457
Ceded	-
Net unearned premiums	<u>\$ 68,310</u>
Incurred losses and loss adjustment expenses	
Direct	71,853
Assumed	622
Ceded	1,380
Net incurred losses and loss adjustment expenses	<u>\$ 73,855</u>

MSF commuted five of its outstanding excess of loss reinsurance contracts during the six months ended December 31, 2015. MSF received \$885K from Canada Life Assurance Company and removed \$1.2M of reinsurance recoverables from its reserves, resulting in losses incurred of \$339K and loss adjustment expenses incurred of \$1K.

MSF's ceded aggregate stop loss contracts contain a contingent commission that provides for additional or return commission based on the actual loss experience of the ceded business. The amount of accrued commission as of December 31, 2015 is \$67.1M.

Note 12 - Leases and Commitments

MSF leases office facilities and equipment under various operating leases that expire through February 2021. Rental expense for the six months ended December 31, 2015 was \$25K.

MSF leases 350 parking spaces in a parking garage that was built by the City of Helena adjacent to the MSF facility that expire June 30, 2040. The cost of the parking spaces will be the same monthly rate as equivalent parking passes sold by the City. The annual subsequent parking cost is estimated to be \$298K with potential to change based on parking rates assigned by Helena Parking Commission.

Future minimum rental payments are as follows for the years ending December 31:

2016	\$ 348,662
2017	334,666
2018	326,116
2019	304,623
2020	300,324
Thereafter	5,880,354
	\$ 7,494,745

Note 13 - Subsequent Events

Subsequent events were evaluated through April 07, 2016, which is the same date the audited financial statements were available to issue.

Note 14 - Contingencies and Uncertainties

Susan Hensley v. Montana State Fund - Montana State Fund received a Petition for Hearing that was filed before the Workers' Compensation Court in October, 2013. The matter is Susan Hensley v. Montana State Fund, WCC No. 2013-3235. The matter is fully briefed and is submitted for a decision. Under HB 334, as passed by the legislature in 2011 and codified in 39-71-703 (2), MCA, when a claimant receives a Class I impairment, it is not payable unless the claimant has an actual wage loss as a result of the compensable injury or occupational disease. The law was effective July 1, 2011 and applicable to claims that occurred on or after that date. The petitioner in this matter is challenging the constitutionality of 39-71-703 (2), MCA. State Fund anticipates the chances are remote, but as with any litigated matter there is the possibility of an adverse decision. Should the statute be held unconstitutional, determined to be applicable to other claims and also determined to be retroactively applicable, potential liability is estimated to be at least \$2.2 million per year, as based on NCCI initial pricing, and current estimated business volumes. However, based on experience, costs may be substantially higher than the estimate of \$2.2 million per year.

Montana State Fund also is involved in other litigation in the areas of workers' compensation and disputes with policyholders. These are of a generally routine nature and there are no known matters at this time that will have a large and widespread financial impact.

Note 15 - Related Party Transactions

In the ordinary course of business, Montana State Fund conducts many of its transactions through State of Montana agencies. The following significant transactions occurred with state agencies during the six months ended December 31, 2015:

Income:

State of Montana agencies	
Premium	\$ 7,189,836
Retrospective premium	485,221
Dividends	<u>(2,000,574)</u>
Net premium income from State of Montana agencies	<u><u>\$ 5,674,483</u></u>

Expenses:

Montana Department of Administration	
Support services costs	\$ 849,149
Benefits Bureau: group insurance	1,585,076
PERS retirement contributions	833,055
Montana Department of Labor & Industry - unemployment insurance	14,939
Montana Board of Investments - transaction fees	193,640
Montana Department of Justice - Fraud investigation services	180,704
Montana - various other	<u>20,879</u>
Expenses paid to State of Montana agencies	<u><u>\$ 3,677,442</u></u>

MSF writes policies for which the premiums vary based on loss experience. Future premium adjustments for these retrospective policies are estimated and accrued through a review comparing actual losses with projected future losses, to arrive at the estimate of return premium. The State of Montana agencies are considered a retrospectively rated group and the estimated accrual at December 31, 2015 was \$2.2M for the policy periods July 1, 2013 to June 30, 2014 and July 1, 2014 to June 30, 2015 combined.

Other amounts due to and from other State of Montana agencies are settled regularly and are not material as of December 31, 2015.

Note 16 - Policyholders' Equity – Change in Non-Admitted Assets

The following is an accounting of the changes in non-admitted assets included in the Statement of Changes in Policyholders' Equity for the six months ended December 31, 2015:

Balance of non-admitted assets, beginning of period	\$ 5,170,183

Note 17 - Policyholders' Equity –Reconciliation of Statutory Equity to GASB Net Position

The following schedule reconciles statutory policyholders' equity calculated in accordance with NAIC SAP to GASB Net Position as determined by governmental accounting principles generally accepted in the United States of America at December 31, 2015. The audited GASB financial statements were not available as of the date of this report, and, therefore the information below was prepared by management and is unaudited.

Statutory policyholders' equity (NAIC)	\$ 505,157,612
Add:	
Non-admitted assets as shown above	6,161,819
Change in investment value of bonds to fair market value	27,765,196
Change in investment value of other invested assets to equity method	(1,898,771)
Change in allowance for doubtful accounts	(2,291,949)
Effect of differences in pension accounting standards on income and policyholders' equity	(19,940,034)
GASB net position	\$ 514,953,873

Supplementary Information
Six Months Ended December 31, 2015

Independent Auditor's Report on Supplementary Information

To the Board of Directors
Montana State Fund
Helena, Montana

We have audited the statutory financial statements of Montana State Fund as of December 31, 2015 and for the six months ended December 31, 2015, and our report thereon dated April 07, 2016, which expressed an unmodified opinion on those financial statements, appears on page 1. Our audit was conducted for the purpose of forming an opinion on the basic statutory-basis financial statements taken as a whole. The accompanying supplementary information included in the *Supplemental Schedule of Investment Risk Interrogatories, Summary Investment Schedule, and Supplemental Reinsurance Interrogatories* on pages 28 through 34 are required to be presented to comply with the National Association of Insurance Commissioners' Annual Statement Instructions and the National Association of Insurance Commissioners' Accounting Practices and Procedures Manual and are not a required part of the basic statutory-basis financial statements. Such information included in the schedules referred to above is the responsibility of management, is presented for purposes of additional analysis and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other procedures in accordance with the auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the basic statutory-basis financial statements taken as a whole.

A handwritten signature in black ink that reads "Eide Bailly LLP".

Fargo, North Dakota

	Amount	Percentage of Total Admitted Assets
Federal Home Loan Banks Office of Finance	102,802,671	6.22%
Federal Farm Credit Banks Consolidated Systemwide Bonds	70,230,168	4.25%
American Realty Advisors	47,322,440	2.86%
Federal Home Loan Mortgage Corporation	47,205,486	2.86%
TIAA CREF Asset Management	41,917,514	2.54%
Federal National Mortgage Association	26,616,811	1.61%
JPMorgan Chase & Co.	21,956,553	1.33%
PNC Realty Investors, Inc.	19,992,600	1.21%
Citigroup Inc.	17,013,115	1.03%
Ontario, Government of	17,011,687	1.03%

3. The amounts and percentages of the Company's total admitted assets held in bonds by NAIC rating are as follows:

	Amount	Percentage of Total Admitted Assets
NAIC-1	\$ 894,345,893	54.135%
NAIC-2	216,524,510	13.106%
 Total Bonds	 \$ 1,110,870,403	 67.242%

4. The amount of assets held in foreign investments is \$86.1M, which is 5.21% of the Company's total admitted assets. None of that amount is denominated in a foreign currency.

5. All foreign investment exposure is related to countries designated as NAIC-1.
6. The largest foreign investment exposures by country, categorized by the country's NAIC sovereign designation are as follows:

	<u>Amount</u>	<u>Percentage of Total Admitted Assets</u>
United Kingdom	\$ 23,599,934	1.43%
Bermuda	14,996,158	0.91%

7. The ten largest non-sovereign foreign issues as of December 31, 2015 were as follows:

	<u>NAIC Designation</u>	<u>Amount</u>	<u>Percentage of Total Admitted Assets</u>
Bunge Limited Finance Corp.	2FE	\$ 14,996,158	0.91%
Total Capital International	1FE	9,984,934	0.60%
Niagara Mohawk Power Corporation	1FE	8,575,949	0.52%
Statoil ASA	1FE	6,996,149	0.42%
Jackson National Life Global Funding	1FE	5,063,631	0.31%
MUFG Union Bank, National Association	1FE	5,000,210	0.30%
Novartis Securities Investment Ltd.	1FE	4,996,737	0.30%
Swedbank AB	1FE	4,994,552	0.30%
American Honda Finance Corporation	1FE	4,991,849	0.30%
Shell International Finance B.V.	1FE	4,985,585	0.30%

8. The amount of assets held in Canadian investments is less than 2.5% of the Company's total admitted assets.
9. The Company does not hold any assets with contractual sales restrictions.
10. The amounts and percentages of the Company's total admitted assets held in equity interests are as follows:

	<u>Amount</u>	<u>Percentage of Total Admitted Assets</u>
Blackrock	\$ 163,817,100	9.916%

11. The Company does not hold any privately placed equities.
12. The Company does not hold any general partnership interests.

- 13. The Company does not hold any mortgage loans.
- 14. The amount of assets held in real estate is less than 2.5% of the Company's total admitted assets.
- 15. The Company does not hold any mezzanine real estate loans.
- 16. The amounts and percentages of the Company's total admitted assets subject to securities lending agreements are as follows:

	Amount	Percentage of Total Admitted Assets
Securities lending agreements	\$ 65,532,939	3.967%

- 17. The Company does not hold any warrants.
- 18. The Company does not have any exposure for collars, swaps, or forwards.
- 19. The Company does not have any exposure for futures contracts.

The following interrogatories are included in accordance with SSAP No. 62R:

7.1 Has the reporting entity reinsured any risks under a quota share reinsurance contract with any other entity that includes a provision that would limit the reinsurer's losses below the stated quota share percentage (e.g. deductible, a loss ratio corridor, loss cap)? If yes, indicate the number of reinsurance contracts containing such provision and if the amount of reinsurance credit taken reflects the reduction in quota share coverage caused by any applicable limiting provision(s).

Yes No

8.1 Has the reporting entity reinsured any risk with any other entity and agreed to release such entity from liability, in whole or in part, from any loss that may occur on this risk, or portion thereof, reinsured?

Yes No

9.1 Has the reporting entity ceded any risk under any reinsurance contract (or under multiple contracts with the same reinsurer or its affiliates) for which during the period covered by the statement: (i) it recorded a positive or negative UW result greater than 5% of prior year-end surplus as regards to policyholders or it reported calendar year written premium ceded or year-end loss and loss expense reserves ceded great than 5% of prior year-end surplus as regards policyholders; (ii) it accounted for that contract as reinsurance and not as a deposit; and (iii) the contract(s) contain one or more of the following features or other features that would have similar results:

- a. A contract term longer than two years and the contract is non-cancellable by the reporting entity during the contract term;
- b. A limited or conditional cancellation provision under which cancellation triggers an obligation by the reporting entity, or an affiliate of the reporting entity, to enter into a new reinsurance contract with the reinsurer, or an affiliate of the reinsurer;
- c. Aggregate stop loss reinsurance coverage;
- d. An unconditional or unilateral right by either party to commute the reinsurance contract, except for such provisions which are only triggered by a decline in the credit status of the other party;
- e. A provision permitting reporting of losses, or payment of losses, less frequently than on a quarterly basis (unless there is no activity during the period); or
- f. Payment schedule, accumulating retention from multiple years or any features inherently designed to delay timing of the reimbursement to the ceding entity.

Yes No

9.2 Has the reporting entity during the period covered by the statement ceded any risk under any reinsurance contract (or under multiple contracts with the same reinsurer or affiliates), excluding cessions to approved pooling arrangements or to captive insurance companies that are directly or indirectly controlling, controlled by, or under commune control with (i) one or more unaffiliated policyholders of the reporting entity, or (ii) an association of which one or more unaffiliated policyholders or the reporting entity is a member, where:

- a. The written premium ceded to the reinsurer by the reporting entity or its affiliates represents 50% or more of the entire direct and assumed premium written by the reinsurer based on its most recently available financial statement; or
- b. 25% or more of the written premium ceded to the reinsurer has been retroceded back to the reporting entity or its affiliates.

Yes No

- 9.4 Except for transactions meeting the requirements of paragraph 30 of SSAP No. 62R, has the reporting entity ceded any risk under any reinsurance contract during the period covered by the financial statements, and either:
- a. Accounted for that contract as reinsurance (either prospective or retroactive) under SAP and as a deposit under GAAP; or
 - b. Accounted for that contract as reinsurance under GAAP and as a deposit under SAP.

Yes No

The accompanying schedules and interrogatories present selected statutory-basis financial data as December 31, 2015 and for the six month period then ended for the purpose of complying with paragraph 9 of the Annual Audited Financial Reports in the Annual Audited Report section of the National Association of Insurance Commissioners' Annual Statement Instructions and the National Association of Insurance Commissioners' Accounting Practices and Procedures Manual and agree to or are included in the amounts reported in the Company's December 31, 2015 Statutory Annual Statement.
